

NEWS RELEASE

CONCRETE CANVAS SIGNS TITAN AS NEW EXCLUSIVE SALES PARTNER FOR CANADA

April 22, 2019

Concrete Canvas Ltd. (Concrete Canvas), manufacturer and inventor of the innovative Concrete Canvas® GCCM*; and Titan Environmental Containment Ltd. (Titan), a leading Canadian geosynthetics supplier, are pleased to announce that they have entered into a distribution agreement granting Titan exclusive rights to distribute Concrete Canvas® in Canada.

UK based Concrete Canvas Ltd. began manufacturing innovative GCCMs in 2005 and first brought their Concrete Canvas® product to the Canadian market with Nuna Innovations Inc. (Nuna), a former division of the Nuna Group of Companies. Concrete Canvas® is a flexible concrete impregnated fabric that hardens on hydration to form a thin, durable water proof and fire-resistant concrete layer. This allows concrete construction without the need for plant or mixing equipment. The geosynthetic cementitious composite mat consists of a three-dimensional fibre matrix containing a specially formulated dry concrete mix. A PVC backing on one surface of the cloth ensures the material is completely waterproof. The material can be hydrated either by spraying or by being fully immersed in water. Once set, the fibres reinforce the concrete, preventing crack propagation and providing a safe plastic failure mode.

Due to the versatility of Concrete Canvas®, its speed of installation and low logistical footprint, the demand for the product continues to grow worldwide. In the first half of 2019 alone, products have been sold to over 50 countries. Concrete Canvas® has several core applications, with the Canadian market being focused to date on channel lining in the mining sector. Other applications include, but are not limited to, bund lining, slope protection, weed suppression and remediation of existing concrete infrastructure.

“We look forward to establishing a long-term collaborative relationship with TITAN, who are a rapidly growing, dynamic and powerful force in the Canadian geosynthetic market,” said Will Crawford, Director of Concrete Canvas.

The new partnership between Titan and Concrete Canvas is based upon a mutual desire to develop and market innovative geosynthetic products for the civil and infrastructure sectors.

“We are thrilled to have been selected as the new exclusive Canadian distributor for Concrete Canvas® and continue to build on Nuna’s legacy from the previous 8 years,” says Juice Lambert, VP of Sales for Titan. “As a progressive company, we are continuously seeking to grow and elevate our offerings to better serve our clients in a multitude of sectors. We really see Concrete Canvas® as complementing our existing suite of products and are excited to make this available beyond mining into the agricultural, municipal, civil and infrastructure sectors.”

To support this venture Titan has opened a new 4,200 square foot location in Squamish, British Columbia, complete with office and shop space; and has added two new members to its team, Ron Drewry and Rebecca Spitzer, who are dedicated to Concrete Canvas® sales. The product will be available from all Titan locations across Canada.

ABOUT CONCRETE CANVAS

Concrete Canvas Ltd. was incorporated in the UK in 2005, it manufactures three award winning products, Concrete Canvas®, Concrete Canvas Shelters™ and CC Hydro™. These products were developed to exploit a unique material technology invented by Peter Brewin (MEng) and Will Crawford (MEng) whilst studying Industrial Design Engineering at Imperial College and the Royal College of Art in London.

Concrete Canvas Ltd's core material technology enables the supply of unique construction solutions that are extremely fast, easy to install and environmentally friendly. The company prides itself on innovation, quality and responsiveness to our customers' needs.

The primary markets for Concrete Canvas Ltd. are in the civil infrastructure (road and rail), mining and petrochemical sectors where CC is used for erosion control applications such as channel lining, slope protection and bund lining. The company has grown rapidly since 2005 and has sold its products to over 80 countries around the world.

ABOUT TITAN ENVIRONMENTAL CONTAINMENT

Established in 2006, Titan Environmental Containment Ltd., specializes in the supply and installation of high quality geosynthetics, containment systems, and speciality civil engineering products such as geomembrane liners, geogrids, geotextile fabrics and erosion control products that all help manage and protect the environment. A leader in their field, they provide innovative and cost-effective solutions for a wide range of civil engineering, environmental and geotechnical projects across a variety of sectors including; road construction, water and waste management, mining, oil and gas, hydro-electric and agriculture.

With extensive installation, sales, project management and technical expertise, their team excels at working with clients in the consultation, planning and execution phase of any project to get the job done right, on time, and on budget.
