

TITAN TIMES

SPRING 2014 ISSUE 02

NEWS & HIGHLIGHTS

We're Coming to Regina!

Titan is pleased to announce that a new location in Regina is coming soon! With this news, we are also pleased to welcome Jaret Resler to our team. Starting July 1, 2014, Jaret will join Titan as our Saskatchewan Sales Manager bringing diverse experience in sales, manufacturing and operations. For your next project in Saskatchewan contact Jaret at 306-531-9094.

Fort McMurray Wrap Up

The Alberta crew was very busy with multiple contracts in Fort McMurray this year. Fred Rudolph, Alberta Regional Manager, was very pleased with the outcome, "our crews worked extremely hard to serve our new clients including Enbridge, Nexen, Grizzly Oil Sands, Syncrude, and the Wood Buffalo Fort McMurray Landfill. We developed very good relationships with all the general contractors that we worked with which allowed the projects to go smoothly."

Cable Concrete® Now at Titan

At Titan we consistently work to bring you the best materials in the industry and are thrilled to now offer Cable Concrete®, one of the most up-to-date erosion control materials. A complete engineered

system, Cable Concrete has many applications and was recently highlighted in several news pieces discussing the ongoing remediation work following last years' flash flooding in Alberta. The many benefits of this product include its durability, aesthetic appeal, user friendliness and ease of installation. For more information on Cable Concrete contact Juice at 1-866-327-1957.

Introducing New Lining Technology

Brett Burkard, Titan Principle, was proud that Titan was able to bring Leak Location Liner, the latest in lining technology, to Manitoba farmers. "Leak location liner is just what our customers in the agricultural market need. "They have to clean out the

manure storages on an annual basis, risking damage to the liner," said Brett. "Now they have a way to test the liner anytime they need to ensure a leak free system." He also commented that he would love to see the Canadian waste industry embrace Leak

Location Liner, "Our colleagues south of the border are installing this type of geomembrane for landfill applications which is eliminating the guess work about leaks and making it easier for end users." For more information on Leak Location Liner, contact Brett at 1-866-327-1957.

Spotlight on Bentoshield GCL

Titan installed Bentoshield GCL geomembranes in a number of projects in Ontario including Hanover landfill leachate pond, Calstock Landfill and the Beltline pond at Whitechuch Stoffville. Bentoshield GCL's versatility and sealing effectiveness make it a good choice for wide variety of environmental projects from landfills to mining areas, lagoons and canals. We are extremely happy to offer our clients a one stop shop for the supply and installation of GCL and geomembranes.

USA UPDATE

Titan USA Kicks Off!

Russ Jackson, Titan USA Principal and Construction Manager, and his crew tackled a very difficult winter installation of an interim landfill cap at Ontario County, New York. Russ and his highly experienced crew bring invaluable knowledge and skills, making Titan USA a serious liner installation competitor in the United States." Russ has been installing geosynthetics throughout North America for over fifteen years and we are thrilled to have him as our partner in the United States," said John Mooney, VP Titan USA.

SAM'S GEOGRID CORNER

Focus on TE-FG (Fiberglass)

Using our state of art TE-FG (Fiberglass) geogrid series products, Titan completed a number of asphalt reinforcement projects for highways and roads in the Indiana and Washington state to help reduce the maintenance costs and increase the infrastructure life cycle.

We Are CE Certified!

Titan is proud to now be CE certified for our complete range of high tenacity Polyester (PET) geogrids, Coated Fiberglass geogrids (FG), integrally formed Polypropylene (PP), and High Density Polyethylene (HDPE) geogrids. This accreditation assures Titan's ongoing compliance with globally recognized standards for quality management.

KELLY'S INTERNATIONAL ROUND UP

Building Relationships

We are pleased to have held lunch and learn sessions in Mexico with corporate representatives. "The lunch and learns were very well received and were an important step in building valuable relationships in Latin America," said Kelly Sitarz, Principal, International Sales. "We look forward to growing these relationships and working in Mexico in the future."

Caribbean Pond Complete

Titan was recently awarded a contract to line a feature pond spanning the front entrance of a very high profile resort development in the Caribbean. Our experienced Caribbean crew began installing the plastic insert in the concrete this month to enhance the ponds aesthetic appeal. Our client was very pleased with the professionalism and dedication of our crew to high quality installation procedures.

Contracts and Sales Abroad

After months of networking abroad, Titan is pleased to have won prestigious government contracts in New Zealand and Malaysia, and sold multiple containers of various geotextiles and geogrids for haul roads stabilization, retained earth structures and other highway projects. "Having recently achieved CE certification has been a huge benefit for Titan by allowing us to secure these international contracts and sales," said Sam Bhat, VP Global Business Development and CTO of Geosynthetics for Titan. "It is nice to see that our time and effort towards gaining this accreditation has paid off."

TITAN TANK NEWS

Tank Connection Advantage

Titan is proud to supply and install premium tanks from Tank Connection Affiliate Group. Tank Connection designs and manu-

factures the highest quality dry bulk and liquid storage systems worldwide using state-of-the-art powder coat technology. Our Tank division has been working hard to promote this product and we are happy to report that, with the help of great local representation, Titan has made great strides in establishing the Titan & Tank Connection brands in Jamaica and the Dominican Republic.
