# NEWS RELEASE

## TITAN USA POSITIONS FOR GROWTH

**July 6, 2022**

Titan Environmental is excited to announce growth of its U.S. Operations with expansion of the Titan Environmental USA (Titan USA) team, and construction of a new facility in Houston, Texas.

Additions to the USA team include, Bryce Goehring, Titan co-owner, who relocated from Alberta, Canada, to Houston in a new role as VP of USA Business Development responsible for growing Titan USA business operations. Joining Bryce are two new team members, Ron Pickett in the position of USA Sales Consultant, and Derek Huffman as Operations Manager for Titan USA. Both Ron and Derek are focused on specialty concrete lining projects.

Ron Pickett brings nearly a decade of direct experience in concrete underground utility tunnel lining projects along with a strong network of business relationships across California and Texas which he will continue to build in role.

Derek Huffman joins with extensive geosynthetic knowledge coupled with industry experience in sales, estimating and project management. As Operations Manager, Derek will oversee installations of Concrete Canvas® and concrete protective liner, two new products in Titan USA's portfolio, for projects in Texas and the Southwestern portion of the USA. He is supported by existing Titan team members, Ron Drewry and Rebecca Spitzer, dedicated to Concrete Canvas® sales.

To accommodate this operational growth, Titan USA has also recently broken ground on a 40,800<sup>2</sup>ft facility located on a 9-acre lot in Houston. This new facility will not only provide additional working space but increases capacity for current geomembrane fabrication and much needed space for expansion of product stock. Construction is well under way with completion and relocation of current operations is anticipated for this coming Fall.

"We have an ambitious company culture and pride ourselves on building solid teams," says Titan CEO & Co-Founder, Brett Burkard. "It's exciting to see our US team and infrastructure grow. This will allow us to build on our success by strengthening our relationships with existing suppliers and customers across the country, and developing new ones alike. We are excited for what the future holds for Titan USA."

Titan is a North American leader in the supply, installation, and fabrication of high-quality geosynthetics and specialty civil engineering construction products that help manage the environment and prolong the life of critical infrastructure. Operating in Canada and in the USA, we offer a range of innovative, low-impact and cost-effective solutions designed to protect soil, water, and air, and reduce carbon footprint. Our products are used in civil, environmental, and geotechnical projects in a variety of sectors, including Civil Infrastructure, Water and Waste Management, Mining, Oil and Gas, Hydroelectric, Agriculture and Sports & Recreation.

Leveraging our wide reach and highly experienced people, Titan focuses on delivering the best solution for clients. With extensive installation, fabrication, project management and technical product expertise our team excels at working with clients in the consultation, planning and execution phases of any project to get the job done right, on time, and on budget.
