TITAN ACQUIRES HEWITT GEOSYNTHETICS OUT OF ONTARIO

September 6, 2023—Titan Environmental Containment (Titan) is proud to announce that a deal has been reached with John Hewitt, founder of Hewitt Geosynthetics, to acquire the company's business operations in the Greater Toronto Area (GTA).

Founded in 2011, Hewitt Geosynthetics (Hewitt) has a long history in the GTA founded on strong customer relationships and top-notch service—an approach that parallels Titan's corporate culture and business philosophy.

“Mr. Hewitt has built a successful geosynthetics business with an outstanding reputation in the GTA,” says Titan CEO & Founder, Brett Burkard. “There is clear alignment between the company's customer centric approach and the ‘*Titan Way*’ of doing business, and we look forward to continuing to service Hewitt customers to the standard that they've become accustomed to.”

As part of the deal, Titan is absorbing Hewitt's existing customer base and John Hewitt has joined the team at Titan to help facilitate the transition.

“With over 35 years in the Geosynthetics industry, I'm happy to be easing into retirement by helping to transfer my customers over to Titan,” says John Hewitt. “I take great comfort in the fact that Titan values customer service and relationships as much as we do at Hewitt Geosynthetics. I am confident that my customers will be well served and I'm still available on my mobile during this transition.”

Operating in Canada and in the USA, Titan Environmental supplies proven geosynthetics and specialty civil engineering construction solutions designed to extend the life of vital infrastructure while protecting precious natural resources.

We push limits with creative solutions. Our product lines include geomembranes, geotextiles, geogrids, primary & secondary containment systems, stormwater management solutions, drainage solutions, MSE wall & slope systems, and erosion & sediment control products.

We service the civil construction, agricultural, waste management, water resources, mining, oil and gas, and hydroelectric industries that support essential infrastructure worldwide.

By providing engineers with a resilient foundation for building better, we've become North America's fastest-growing-end-to-end geosynthetics supplier, fabricator, and installer. We do more than help manage environmental impact, we help improve how that's done.

With a team of audacious innovators and agile problem-solvers, we're trusted to adapt to change, respond quickly, and support our customers and partners at every stage.
